Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Examiner has not found any Prior Art references describing an assembly comprising a heat-generating device attached to a printed circuit board, and a thermal management system, the thermal management system comprising a heat sink having an interior lumen, and a coolant channel at least partially formed in a layer of the printed circuit board, the coolant channel being in fluid communication with the heat sink lumen. The allowability, at least in part, resides in above described structure having elements that are not disclosed in the prior art searched. The applicant satisfactory amended the claims to overcome rejections under 35 USC §102 and §103 stated in the previous Rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Hamilton et al (US Patent 5,763,951) teach a multi-layer printed circuit board (PCB), figs. 2-10, comprising: a plurality of mounting areas for attaching a plurality of heat producing devices - transistor dies 100 (152), and a coolant circulation channel 118 formed in a layer of the PCB by removal of portions of one or more layers of said PCB (etching-abstract, line 3), the channel having a portion in a vicinity of the mounting area, and a liquid coolant 116 circulating through said channel being forced by a pump 114 (154). Hamilton et al 951 teach furthermore: said channel includes a portion in thermal contact with a heat sink 164. Hamilton et al teach furthermore said heat sink

having a channel 116, Fig.5, said coolant channel at least partially formed in a layer of the printed circuit board being in fluid communication with the heat sink channel 116 through a fill valve 160 and a check valve 168. Hamilton et al do not teach said channel 116 being an interior lumen in the heat sink 164. (By Hamilton et al said channel is formed by surfaces of the heat sink 164 and the circuit board 151.
